

Deschutes (DES) NRCS Basin Total Resource Lands Converted to Urban Lands

1997 National Resources Inventory (NRI) Results (Revised December 2000)

Estimated for Non-Federal Lands Only

Resource Lands¹ Converted Acreage Estimates and Annual Rates

ACREAGE ESTIMATES

<u>Years</u>	<u>Estimates</u>	<u>Error</u>
1982 to 1992	24,700	10,100
1992 to 1997	9,000	3,500
1982 to 1997	33,700	2

ANNUAL RATES

<u>Years</u>	Estimates	Annual Rates ³
1982 to 1992	24,700	2,470
1992 to 1997	9,000	1,800

Annual Rate Percent Change⁴ = -27%

NOTE: Total estimates may be adjusted to account for rounding. The error referred to in the table is the standard error of the estimate. You can obtain the margin of error at the 95% confidence limit by multiplying the error by 1.96. Standard errors greater than 50% of the estimate indicate a low level of statistical reliability.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TAGRET Center at (202) 720-2600 (voice and TDD).

¹/- Resource Lands include Cultivated Cropland, Non-Cultivated Cropland, Pastureland, Rangeland, and Forestland.

²/ - The estimates for total resource lands converted between 1982 and 1997 were derived by adding the 1982 to 1992 and 1992 to 1997 estimates together. There are no standard error estimates for 1982 to 1997.

 $^{^{3}}$ / - Annual Rates = acres/year. Time periods: 1982 to 1992 = 10 years, 1992 to 1997 = 5 years.

 $^{^{4}}$ / - Percent Change = (1992 to 1997 rate – 1982 to 1992 rate)/1982 to 1992 rate.
